1) Connect the elements with the sticks.

2) Set up the walls and put it together to a hexagon.

3) Put the clips through the holes of the lids until they click into place.

4) Now connect the two single parts of the lid with the bolts.

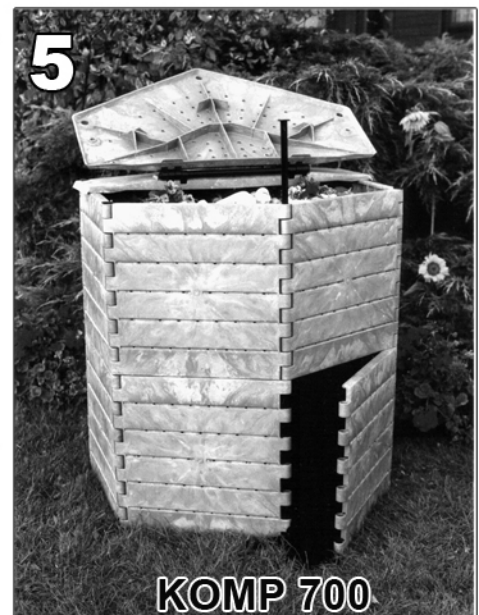

Place thermo composter on a stable and horizontal ground on the earth outdoors.

525 liter, Ø 108 x H 85cm, 2 bolts, 8 clips, 6 sticks, 6 big elements, 6 small elements, 2 single parts of the lid, ~23 kg.

5) The thermo composter is now ready to use.

Fire Hazard Safety Measure: Do not put hot ashes in the thermo composter. Site at least 3m from any combustible objects, such as sheds, trees, oil or gas tanks etc.

700 liter, Ø 108 x H 105cm, 2 bolts, 8 clips, 6 sticks, 12 elements, 2 single parts of the lid, ~27 kg.
